Paul Hoang

Profile

A self motivated and proactive man, who is Sun Certified Java Programmer 6 and Hybris certified, likes working with people, is reliable, an able communicator and is willing to work hard. Currently working as a Java Web Developer at CrownPeak doing angular 2 frontend development.

Key Technical Skills

Main Focus - Back End	Java 6/7/8 (6 certified) – Hybris - Spring - Spring Integration – Java Spark (Web framework) - J2EE - Struts - Servlets - SQL
Front End	HTML - JSP - CSS – LessCSS – JavaScript - Typescript – Angular2js – jQuery – jQuery Mobile – Spring MVC – exposure to Photoshop/Gimp/Lightroom
Servers / Containers	JBoss AS 4 - Jetty - Tomcat - Apache Web server
Databases	Oracle - MySQL - Hibernate - Schema Design
Methodologies	Agile - Object Oriented Programming - Test Driven Design - Domain Driven Design
Other	Requirements Capturing – 7/8/10 - Enterprise Linux – OSX - Netbeans – IntelliJ Idea - Eclipse - Apache Ant – Maven – Gradle - Mercurial – Git - Subversion - JUnit - Mockito- Technical Design Documentation – UML – Puppet - Docker

Employment

September 2016 – Present

CrownPeak (ActiveStandards)

Employed as a senior developer doing mostly frontend development on the in house CMS application. The technology stack included angular 2 (ng2), angular 1, LessCss, Node npm, Bower, Jade (Pug), Visual Studio, Windows 10.

The team I joined is a highly self organised agile team, running grooming sessions, retrospectives, iteration kick off meetings and end of train demos.

November 2015 – September 2016 e2y

Onsite as a hybris developer contractor. e2y is a young agile company, developing ground breaking e-commerce solutions focusing on high quality code and processes.

While there I designed and developed software solutions for a high end fashion marketplace retailer.

August 2015 – October 2015

rightmove.co.uk

Rightmove is the number one property listing website, with millions of new properties

listed. It provides a platform to allow estate agents to list properties which in turn connects vendors to buyers.

As a senior developer, I worked on a number of the backend tools used by both the business and the estate agents. My time is split between supporting the old applications as well as developing new features for the current system.

May 2010 – August 2015

Neoworks (A Salmon company)

neoworks is an ecommerce consultancy company, that works with a number of large blue chip companies on their complex ecommerce websites based on the Hybris platform. Recently acquired by Salmon, they have become the best company to approach when using hybris.

As a senior developer, I worked on any aspect that required my skills. From frontend work to backend to integration.

I've worked on a number of projects while at neoworks and some of these are for companies such as: Ted Baker, BBC, Asics, Toys R Us (both desktop and mobile sites), Nikon, The Toyshop, DHL, Target, iStone, HQHair, Urooms and the neoworks website.

Some of the more recent projects used, Java, Spring, Spring MVC, Spring Integration, Spring Roo, Hibernate, Hybris, servlets, mercurial, html, JSP, CSS

July 2007 – May 2010

Bluecycle.com – An Aviva (Norwich Union) Company

My role at Bluecycle required me to continually develop and maintain the current web application (currently deployed onto JBoss AS 4.2.3). It is currently split approximately 50/50 between application maintenance and development. Maintenance requires skills in technologies such as Struts, JSP, SQL (Oracle), EJB 2 as well as front end development in HTML, CSS and JavaScript.

My last project involved rewriting the frontend of the website to allow push bidding (reverse ajax) on auction items. The technologies involved were Apache wicket and Dojo. We have just started a new work process that is like Agile. It involves user stories, epics, sprints, miles and information radiators.

Over the past year, we have been working on a (Greenfield) project that involves redeveloping a large section of the web application using more modern technologies. These technologies include Domain Driven Design, JBoss Seam, JSF, EJB 3 and Woodstock.

Education

University of Westminster 2002-2005

BSc Software Engineering Degree 2:2 (for full listing of modules available upon request)

Lewisham College 2000-2002

AVCE in ICT (B,B) – (2 year college course, equal to 2 full A Levels)

Deptford Green Secondary School 1995-2000

GCSE: Maths (B), Science (C,C), English (C,D), Drama (B), I.T (B), Religious Education (C), French (C)

**Additional
Information**

In my spare time, I enjoy learning about new technologies. These include both PC hardware and web development software. I enjoy building custom PC's that have small footprints

(Mini itx) and low power consumption/noise. I have a number of raspberry pi's too all running on different things with the aim to one day play with big data on them and see the limitations on this small platform.

Other things I like doing are watching movies, playing computer games and badminton.

Information on additional work experience, voluntary work and academic grades are available on request.
