Looking for: Contract work
Rate: dependent on role
Availability: September
Desired Location: London
Nationality: British

Paul Hoang

Profile	
	A self motivated and proactive man, who is Sun Certified Java Programmer 6, Scrum, SAP Hybris and AWS certified, likes working with people, is reliable, an able communicator and is willing to work hard. Currently seeking roles that would suit my skill set and give opportunities in learning new technologies (Kotlin, Java 9+, Kubernetes).

Key Technical Skills		
	Main Focus - Back End	Java 6/7/8 (6 certified) – Hybris - Spring - Spring Integration – Spring Boot – Spring Batch - GraphQL - Java Spark (Web framework) - J2EE - Struts - Servlets - SQL
	Front End	HTML - JSP - CSS – LessCSS – JavaScript - Typescript – Angular2js – Jade (PUG) - jQuery – jQuery Mobile – Spring MVC – exposure to Photoshop/Gimp/Lightroom
	Servers / Containers	JBoss AS 4 - Jetty - Tomcat - Apache Web server - Nginx
	Databases	Oracle - MySQL - Hibernate - Schema Design
	Methodologies	Agile - Object Oriented Programming - Test Driven Design - Domain Driven Design – Microservices – Cloud - Scrum
	Other	Requirements Capturing – Windows 7/8/10 - Enterprise Linux – Mac OS - Netbeans – Intellij Idea - Eclipse - Apache Ant – Maven – Gradle - Mercurial – Git - Subversion - JUnit - Mockito- Technical Design Documentation – UML – Puppet – Docker – Continuous Integration / Deployment (CI/CD) – AWS – Ansible

Employment	
	Feb 2017 – Present　　　　**NHS**　　　　**Senior Fullstack Developer**

Employed as a senior fullstack developer doing mostly backend development in Java 8. Using technologies such as Springboot (Web, Batch), Hibernate, Flyway, SQL, Docker, Ansible. On the frontend the stack included angular 2 (ng2), angular 1, LessCss.

The team I joined is a medium sized agile team, that had quite a custom workflow. Whereby tasks/stories were not estimated and process was more like ScrumBan.

My recent responsibilities have moved more into a managing role as a large part of the team have now moved on. I have recently been trying to fix team dynamics and process by introducing more structure and moving the team towards Scrum. Training and mentoring junior developers has taken more time as well as architecting the solution and fixing technical debt. Other things include working more closer with DevOps as well as working on DevOps related stories, scheduling/running interviews for new team members and

running scrum ceremonies.

The project I worked on was the trainee management system that was being deployed nationwide. It was heavily microservices based and ran along side the existing legacy system that was being replaced. This meant that we had master/slave/migration challenges which involved many custom ETL's that ran nightly. Other parts of the system were spun up at a rapid pace using Jhipster which allowed us to create many services within weeks.

September 2016 – Jan 2017   CrownPeak   Senior Fullstack Developer

Employed as a senior fullstack developer doing mostly frontend development on the in house CMS application. The technology stack included angular 2 (ng2), angular 1, LessCss, Node npm, Bower, Jade (Pug), Visual Studio, Windows 10.

The team I joined is a highly self organised agile team, running grooming sessions, retrospectives, iteration kick off meetings and end of train demos.

November 2015 – Sept 2016   e2y   Senior Hybris Developer

Onsite as a hybris developer contractor. e2y is a young agile company, developing ground breaking e-commerce solutions focusing on high quality code and processes.

While there I designed and developed software solutions for a high end fashion marketplace retailer on the hybris platform. They were using hybris 5.7 with an on going process to upgrade to hybris 6

August 2015 – Oct 2015   rightmove.co.uk   Senior Fullstack Developer

Rightmove is the number one property listing website, with millions of new properties listed. It provides a platform to allow estate agents to list properties which in turn connects vendors to buyers.

As a senior developer, I worked on a number of the backend tools used by both the business and the estate agents. My time is split between supporting the old applications as well as developing new features for the current system.

May 2010 – August 2015   Neoworks (Salmon)   Senior Hybris Developer

neoworks is an ecommerce consultancy company, that works with a number of large blue chip companies on their complex ecommerce websites based on the Hybris platform. Recently acquired by Salmon, they have become the best company to approach when using hybris.

As a senior developer, I worked on any aspect that required my skills. From frontend work to backend to integration.

I've worked on a number of projects while at neoworks and some of these are for companies such as: Ted Baker, BBC, Asics, Toys R Us (both desktop and mobile sites), Nikon, The Toyshop, DHL, Target, iStone, HQHair, Urooms and the neoworks website.

Some of the more recent projects used, Java, Spring, Spring MVC, Spring Integration, Spring Roo, Hibernate, Hybris, servlets, mercurial, html, JSP, CSS

July 2007 – May 2010   Bluecycle.com – An Aviva   Java Developer
**   (Norwich Union) Company**

My role at Bluecycle required me to continually develop and maintain the current web application (currently deployed onto JBoss AS 4.2.3). It is currently split approximately 50/50 between application maintenance and development. Maintenance requires skills in technologies such as Struts, JSP, SQL (Oracle), EJB 2 as well as front end development in HTML, CSS and JavaScript.

My last project involved rewriting the frontend of the website to allow push bidding (reverse ajax) on auction items. The technologies involved were Apache wicket and Dojo. We have just started a new work process that is like Agile. It involves user stories, epics, sprints, miles and information radiators.

Over the past year, we have been working on a (Greenfield) project that involves redeveloping a large section of the web application using more modern technologies. These technologies include Domain Driven Design, JBoss Seam, JSF, EJB 3 and Woodstock.

Education

University of Westminster   **2002-2005**

BSc Software Engineering Degree 2:2 (for full listing of modules available upon request)

Lewisham College   **2000-2002**

AVCE in ICT (B,B) – (2 year college course, equal to 2 full A Levels)

Deptford Green Secondary School   **1995-2000**

GCSE: Maths (B), Science (C,C), English (C,D), Drama (B), I.T (B), Religious Education (C), French (C)

Certifications

- Sun Certified Java Programmer 6 (SCJP 6)
- Hybris Core Developer
- Hybris Commerce
- AWS Certified Developer - Associate 2017
- AWS Certified Solutions Architect – Associate 2017
- Professional Scrum Master (PSM)

References

Available upon request

Additional Information

In my spare time, I enjoy learning about new technologies. These include both PC hardware and web development software. I enjoy building custom PC's that have small footprints (Mini itx) and low power consumption/noise. I have a number of raspberry pi's, all running on different things with the aim to one day play with big data on them and see the limitations on this small platform (ask me for an update).

Other things I like doing are watching movies, playing computer games and badminton.

Information on additional work experience, voluntary work and academic grades are available on request.
